Guide to the table

Our test is based on the standard AS/NZS 2040:1998. Price is based on surveys in August and December 2013.

This test was completed using machines filled with 3.5kg loads. We recently changed our test method – our earlier tests used machines filled to their full capacity. See Our new test for more information.

Features

All front loaders have water heaters and object traps. Top loaders generally have neither.

For more information about scores and features, click on the question mark symbol beside the heading.
